PANKAJ SHAH

Jodhpur | (91) 6375957804 | pankajshah2941999@gmail.com | developer-ps.com | GitHub| linkedin.com/in/ps29/

EDUCATION

Vellore Institute of Technology — Bhopal, Madhya Pradesh, IN
Master of Computer Application — 2021 – 2023

Lachoo Memorial College — Jodhpur, Rajasthan, IN
Bachelor of Computer Application — 2017 – 2020

SKILLS

- **Programming Languages**: C, C++, C#, JavaScript, TypeScript, HTML5, CSS3, XML, Python, Java
- **Frameworks & Libraries**: React, Next.js, Node.js, ASP.NET, FAST API, Fluent UI, Material UI, Ant Design
- **Databases**: MongoDB, Cosmos DB, MySQL, Firebase
- **Cloud & DevOps**: AWS EC2, AWS SES, Azure Static Web App, Azure App Service, Docker, Linux, Git, NPM, CI/CD
- **Concepts**: RESTful APIs, Microservices, Data Structures & Algorithms, Authentication & Authorization, Server-side Rendering (SSR), Agile, RabbitMQ

WORK EXPERIENCE

System Engineer L2 (Full Stack Software Developer)
Capsitech IT Services Private Limited, Jodhpur — September 2022 - Present

- Architecting and developing a statutory audit module for an Acting Office web application, implementing microservices-based architecture to improve scalability and maintainability.
- Building a scalable real-time chat system with an embedded widget to connect clients with support agents, reducing service response times and boosting customer engagement.
- Integrated Telleroo and Modulr payment providers, HMRC notification, NEST Pension, and Smart Pension enrollment and contribution, bulk EPS submission, and Auto Payroll systems, streamlining payroll processing for 25,000+ users and reducing processing time.
- Engineered an online form for automating employee information aggregation, reducing payroll preparation errors and saving approximately 8 hours per cycle.
- Developed 15+ custom features using C# and ASP.NET, delivering each project ahead of schedule and optimizing cross-departmental workflows.

PROJECTS

Billing & Payment Collection System — February 2026

- Built a full-stack billing application with role-based authentication (NextAuth/JWT), enabling service-based businesses to create invoices and collect payments online.
- Integrated Cashfree Payment Gateway with webhook-based payment confirmation using HMAC-SHA256 signature verification for secure, real-time transaction tracking.
- Automated customer communication via WhatsApp Business API integration, sending payment link and bill directly to customers and reducing manual follow-up.
- Implemented server-side validation with Zod schemas, including GST calculation (CGST/SGST), price verification, and Indian phone number validation.

Hallmarking Management System — November 2024

- Spearheaded reporting and transaction management systems, cutting processing times by 40% and enabling faster response to customer and stakeholder issues.
- Created a transaction management feature generating receipts and QR-coded purity certificates, streamlining tracking of 1,000+ monthly transactions.
- Reduced feature rollout time by 25% through optimized coding practices using HTML5, CSS3, JavaScript, Next.js, and Node.js.

CERTIFICATIONS

- **MongoDB University** - MongoDB for .NET Developers (certificate), 2022,
- **Accenture** - Developer Virtual Experience Program (certificate), 2022,
- **NamasteDev** – Namaste Node.Js (certificate), 2024

LANGUAGE

- English, Hindi
